BERT | FRANK

With the seventh season, the additions to our existing families have a slightly stronger Art Deco influence with bold shapes, repetitive forms and striking material contrasts. Finely machined brass is still the key material the designs are expressed through with highlights coming from soft opalescent glass and beautiful marble. Designed and made in the UK, each light from our award-winning brand is innovative, luxurious and built to last.

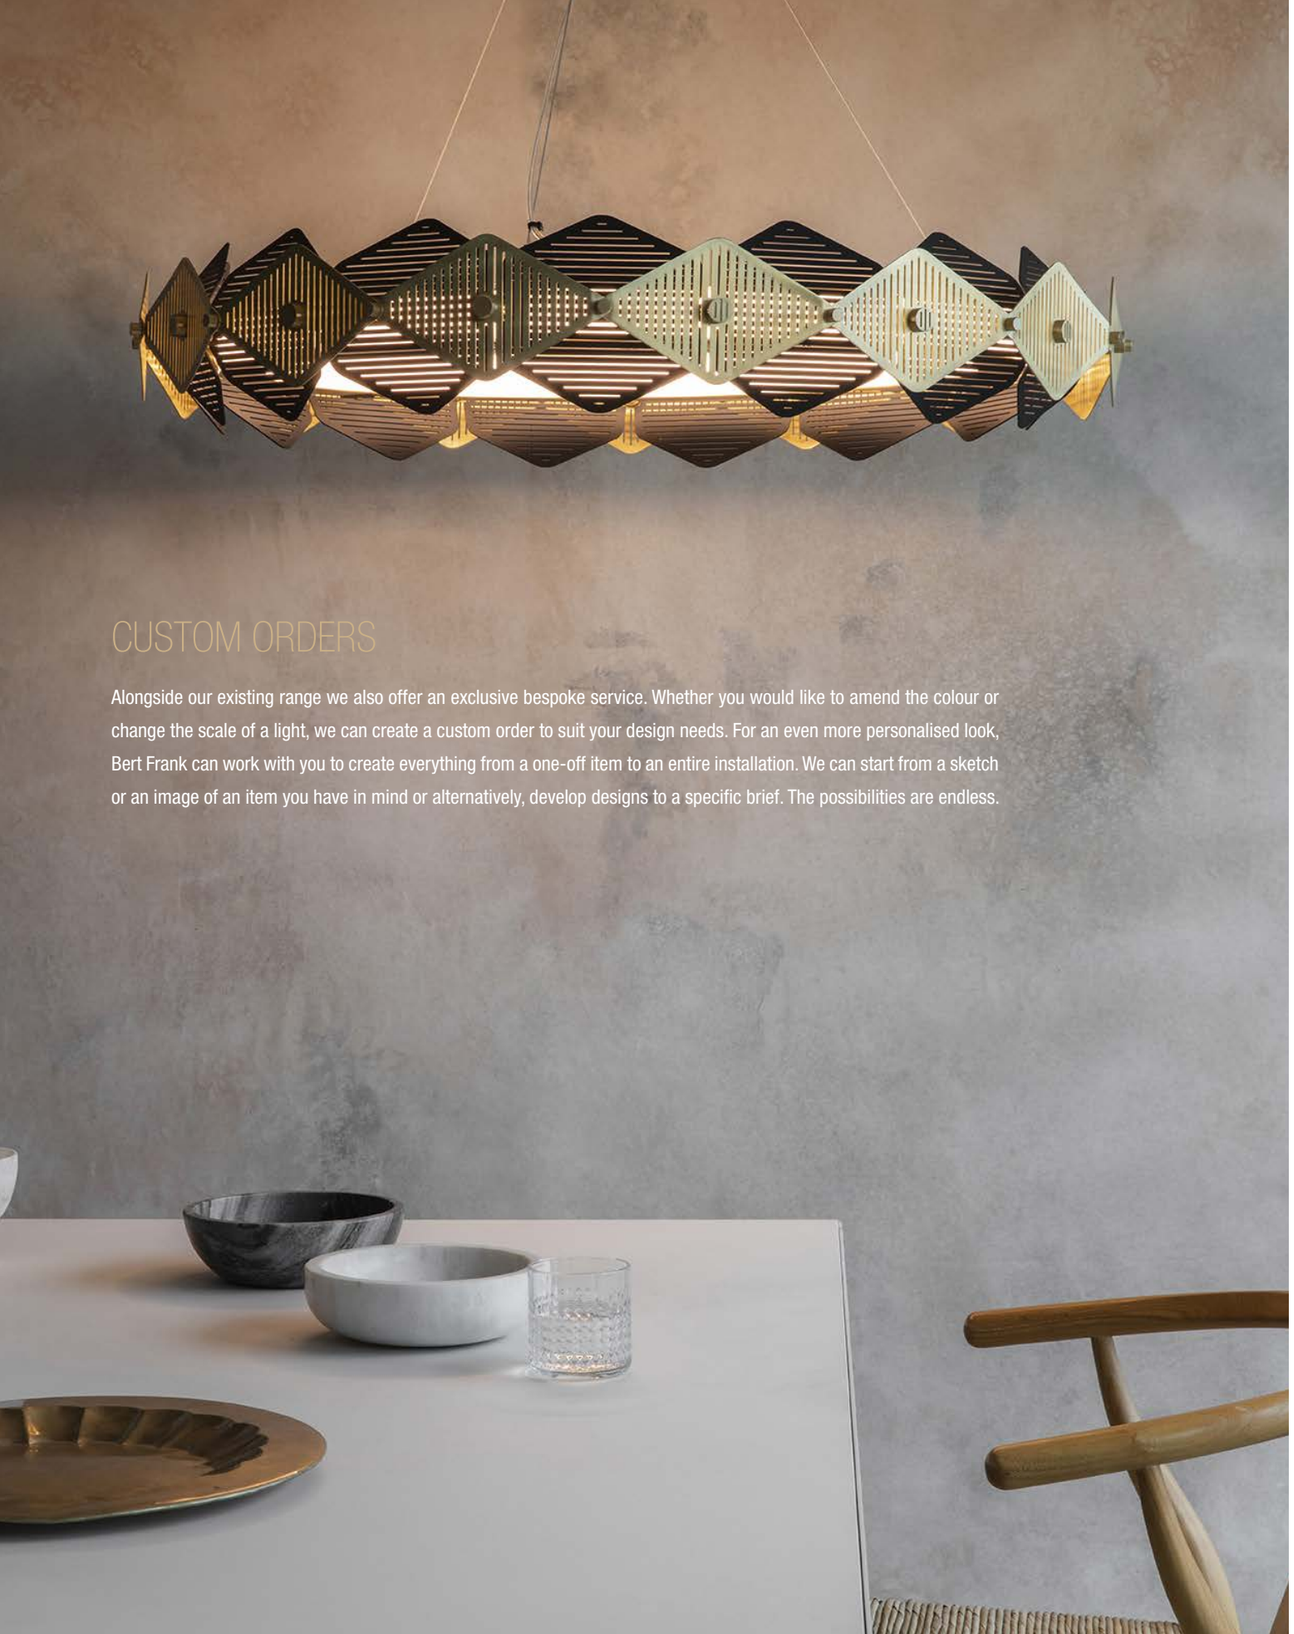
THE FINER DETAILS

Luxurious and functional, Bert Frank designs are made to stand the test of time. Combining traditional manufacturing methods with cutting-edge technology, each light has been crafted from the highest-quality materials. From a sleek rise and fall weight, meticulously tuned from a single billet of brass to the intricate, geometric design of a laser-cut brass diffuser, every small detail is considered.

Designed at the Bert Frank London studio and built at our factory in Birmingham. We are proud to support Britain's rich heritage of quality manufacturing and skilled workmanship and we ensure that every item we produce meets our exacting standards.



CUSTOM ORDERS

Alongside our existing range we also offer an exclusive bespoke service. Whether you would like to amend the colour or change the scale of a light, we can create a custom order to suit your design needs. For an even more personalised look, Bert Frank can work with you to create everything from a one-off item to an entire installation. We can start from a sketch or an image of an item you have in mind or alternatively, develop designs to a specific brief. The possibilities are endless.
